

In collaboration with UNSW, UTS, Sydney University and the Mudgee Microscope Group of Watershed Landcare, the Landholder Collaboration Project presents:

## Mudgee spider monitoring workshop

You are never more than about one metre from a spider as they go about their business of consuming insects and other creepy crawlies. Having a healthy spider community on your farm means you have a healthy biodiverse ecosystem. This workshop will cover:

- How to identify and monitor spiders on your property
- How spiders respond to good land management
- Why working together on spider monitoring is beneficial
- How to upload the information onto an online collaborative tool
- How to use this data to make more informed land management decisions

### Workshop details:

**When:** Tuesday 8 August, 5:30-8 pm. Dinner is included.

**Where:** Burrundulla Room, Mudgee Golf Club  
21 Robertson St, Mudgee

**RSVP:** 1 August, <https://goo.gl/8KhdMQ>  
or contact Emily Berry on 0432 174 850 / [e.berry@unsw.edu.au](mailto:e.berry@unsw.edu.au)
